

### TRADITIONAL STYLE WINDOWS

Made by pine and fir wood, or various other tropical wood materials, glued in tree layers with 68/82 mm thickness, soft profile with curved edges, thermal glass 4+16+4 filled with argon, or “four seasons” glass, various window hardware suitable for horizontal and vertical opening, varnished with ecologically safe varnishes and gloss-paints, double rubber sealing strip, and drip rail. Making of products come in standard or off-standard measurements, taken directly from the building object.
